ABSTRACTS AND CURRENT PAPERS JOURNALS

Three main subject areas are covered by INSPEC abstracts and current papers journals: physics, electrical and electronics engineering, and computer and control engineering. For each field an abstracts journal and a companion titles journal are published. The abstracts journals are intended as library tools for retrospective information retrieval, whereas the companion titles journals, which omit the abstracts and associated indexes, are intended as low-cost current-awareness tools for the individual.

SUBSCRIPTION PRICES

ABSTRACTS JOURNALS	Annual subscription Paper or microfiche	Annual subscription Combined paper and microfiche
Physics Abstracts (PA) Published every two weeks in conjunction with the American Institute of Physics, New York, and the Institute of Physics, London	£120	£180
Electrical & Electronics Abstracts (EEA) Published monthly jointly with the Institute of Electrical & Electronics Engineers Inc., New York	£100	£150
Computer & Control Abstracts (CCA) Published monthly jointly with the Institute of Electrical & Electronics Engineers Inc., New York	£50	£75
Combined Subscription to Electrical & Electronics Abstracts and Computer & Control Abstracts (EEA/CCA)	£120	£180

CURRENT PAPERS JOURNALS	Annual subscription IEE, AIP, IEEE, IOP, IERE members	Annual subscription Non-members
Current Papers in Physics (CPP) Published every two weeks in conjunction with the American Institute of Physics, New York, and the Institute of Physics, London	£7	£14

Current Papers on Computers & Control (CPC) Published monthly jointly with the Institute of Electrical & Electronics Engineers Inc., New York	£6	£12

CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts*, and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966–68. The table below shows the prices and periods for the two types of cumulative index.

	Physics Abstracts		Electrical & Electronics Abstracts		Computer & Control Abstracts

AMERICAN SUBSCRIPTIONS

Physics Abstracts
Current Papers in Physics

For AIP members, wherever they reside, and from the public in the Americas, to the Subscription Department, American Institute of Physics, 335 East 45th Street, New York, NY 10017, USA. Please allow six weeks' notice for change of address, send both old and new addresses and include an address label from a recent issue.

Electrical & Electronics Abstracts
Computer & Control Abstracts and associated current papers journals in these fields

For IEEE members wherever they reside, and from the public in the Americas, to the Fulfillment Manager, Institute of Electrical & Electronics Engineers Inc., 345 East 47th Street, New York, NY 10017, USA.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC database. Information is dispatched weekly on 150 mm × 100 mm (6″ × 4″) cards.

TOPICS

This is an SDI service based on standard profiles. There are 48 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

These are produced, containing all the information included in the INSPEC publications. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

For more details of any of these services please write to:

FACTS

Physics, Electrotechnology, Computers & Control

From the world's technical literature, INSPEC will bring you 150,000 facts this year in the fields of Physics, Electrotechnology, Computers & Control.

These facts will be selected and processed from a wide range of periodicals, conference proceedings, books and reports in all languages, for input to the INSPEC data base, from which all the INSPEC services are derived.

These services include Abstracts Journals, Current Papers, SDI (Selective Dissemination of Information), Topics (SDI service based on standard profiles), and Magnetic Tape Services.

INSPEC is also an agent for many other information services including the Information Service on Nuclear Science and Technology (AERE, Harwell), Metron (Sira Institute), Current Physics Information (American Institute of Physics), and Smithsonian Scientific Information Exchange (Smithsonian Institution).
